

DESCRIPTION

Premium low pressure Acrylic paint combining extreme coverage with no dripping mechanics. Contains acrylic, hydrocarbon and special resins, organic and inorganic pigments, aromatic, aliphatic hydrocarbons as solvents.

FEATURES

- Extreme coverage.
- With low pressure ideal for fine painting.
- Doesn't drip.
- Fast drying.
- Excellent elasticity.
- Easy to apply and recoat.
- Exceptional adhesion.
- 120 matte colors.
- Very good resistance to the sun and rain.
- Rust preventative.
- Fade and chip resistant.

INSTRUCTIONS FOR USE

Shake the container at least 3 minutes after you hear the ball mixer. Before the first use spray it in the air for 3-4 seconds to remove any condensed color. Select the black valve for large surfaces and the grey valve for fine painting and small objects. Spray at a distance of 5-10cm(max.) from the surface. Try the spray on testing surface. For better results apply 2 coats, 3-5 min apart. It allows a later varnishing. If the nozzle is blocked, replace it with a new one. Use outdoors or in a well-ventilated area such as an open garage. Use when temperature is between 10-32°C and humidity is below 65% to ensure proper drying. Do not use on objects that may exceed 90°C surface temperature. After use spray while holding the can inverted for 3 seconds. Clean the actuator with solvent. Storage 10-35°C. Do not put in vehicles. Ask for MSDS.

SURFACE PREPARATION

Remove all dirt, grease, oil, salt and chemical contaminants by washing the surface with a commercial detergent, or other suitable cleaning method. Rinse with fresh water and allow to thoroughly dry. Remove loose paint and rust with a wire brush or sandpaper. Previously coated surfaces must be sound and in good condition. Smooth, hard, or glossy finishes should be scarified by sanding to create a surface profile. In plastics like PS and PP apply first a plastic primer.

PHYSICAL PROPERTIES

Propellant: butane/propane mixture
 Viscosity: 18-25 sec (Flow Cup DIN4, 20°C)
 Density: 0.6-0.8 g/L (Density Cup 100cm³/20°C, ASTM D - 1475)
 Solids: w/w 20-25%
 Flash Point: -104 °C (based on propellant)
 Drying time: Touch (20°C, Humidity<65%): 5-10min
 Through dry (20°C, Humidity <65%) : 1h Maximum hardness: 24 hours
 Coverage: 4m² per 400ml
 Gloss: 3-10 FLAT [GLOSS METER 600ASTM D - 1471]
 Film thickness: 200µm (wet), 50-100µm (dry)
 Can Pressure: 4bar (20°C), 8 bar (50°C)
 Contents: 400ml/322grams (net)
 Shelf life: minimum 5 years.
 VOC CONTENT: 540 g/L

CAUTION

APPLICATIONS

Ideal for DIY, Arts or professional use on most surfaces: wood, metal, stainless steel, glass, plaster, ceramics, stone, fabric, paper and others.
