

TECHNICAL DATA SHEET

Anti-fog high performance nitro thinner

Product description:

Formulated with high selected raw materials, it is used for the dilution of primers, nitro gloss and matt finishes, nitro-synthetic finishes, fast drying synthetic finishes. It enhances the paint's properties, like softness and brightness.

Operating instructions:

Dilute the paint until you reach the required fluidity, ideal to obtain the best spreading and lucidity of the product. It is used in all those cases in which is required surfaces, brushes and airbrushes' cleaning. Product free from chlorinate and methanol.

Advices

It is recommended to do a preliminary test before using the product on the final surface. Avoid release of the product and/or its packaging to the environment.

Chemical and physical characteristics

Specific weight: 0.84 +/- 0.01 g/mL

Flashpoint: < 21° C

Solubility: insoluble in water

Colour: colourless

Physical status: colourless liquid

Delivery:

1 lt, 5 lt cans

25 lt drums

1000 lt IBC tank
