– Flash Point: -104°C (based on propellant)
– Drying time
  (1 Layer, Temperature 20°C, Humidity <65%):
    Touch: 30'
    Dry: 1h
    Maximum hardness: 24h
– Coverage: 2-4m²/L
– Contents: 400ml

INSTRUCTIONS FOR USE

APPLICATION
Clean the surface from dust, grease, rust etc. Shake well for 2-3 minutes. Check the product on a test surface. Cover areas not to be painted. As this product has been developed just for effect purposes and not for protection of the ground, the ground should be a painted topcoat or any other durable surface. Color and degree of gloss decisively form the achieved effect. Spray distance approx. 25-30cm. The result depends on creativity of the user and the desired effect. We recommend spraying short batches. **Optimum application temperature: 16°C - 25°C.**

AFTER USE
Spray holding the can inverted for 3''. Clean the caps with solvent.

STORAGE
10-25°C. Do not put in vehicles.

CAP SYSTEM

SMART CAP
– Less overspray
– Extreme Coverage
– Fast drying
– Hard chisel lines
– Even coating
– Suitably for effects
– Dual way spraying
